Methodologies:	BDD, TDD, CI/CD, Agile/Scrum

Work Experience

JR Academy, Sydney

Front-end Developer

Sept 2018 - Present

Key Responsibilities:

- Create UI components with **React** by following the class-driven approach and bring products into life with **HTML5**, **CSS3** and **JavaScript**.
- Test components with **Jest** and **Enzyme** for usability and fix bugs.
- Use **Redux** to write actions and centralize state storage and all change processing to provide projects with scalability with **redux-thunk**
- Implement responsive design with **Sass**, **Less**, **styled-components** and other UI libraries including **Bootstrap** to ensure the design can be displayed on all devices appropriately.
- Discuss with back end developers on the design and implementation of **RESTful API**.
- Promote collaboration with team members using **Git** and **Bitbucket**.
- Experience with build/dependency management tools, including **npm** and **webpack**.
- Attend project plan meetings to analyze and translate business requirements into working model.
- Capable of quickly learning and delivering solutions as an individual and as part of an agile team.

Achievements:

- Developed series of responsive commercial websites for JR Academy.
- Significantly **reduced website loading time by 1.2 seconds** by implementing SEO methods.
- Implemented responsive design using **flexbox** and **media queries** in both websites.
- Completed tickets assigned quickly to have spare time in helping others.
